TEST CASE MANAGER · DOCUMENTATION

Audit

Who changed what in a Test Case, and when.

One row, one save

What a row shows

Date and time, user, role, action, Test Case, project, a summary of the changes, origin and page.

Actions

Created, Changed, PR added or PR removed. Several fields in one save show the first and “+N”.

Details

Open a row to see every field as “field: before → after”.

Filters and export

Period, user, role, action, Test Case, project, origin (API or Form Factor) and page.

- Filters combine; changing one goes back to the first page.
- Export works as in every other table, with the filters applied.
- Nothing on this page changes or deletes records.
