TEST CASE MANAGER · DOCUMENTATION

Import a project from a spreadsheet

Columns, accepted formats and the most common errors before you upload.

Before you start

Who

Administrator, manager and Key Person, for teams in their scope.

File

XLS or XLSX, up to 25 MB.

Template

Use Download template on the upload page to start from the right columns.

Required columns

Column	What goes in it
App, One UI	The first filled value names the project, as in “Clock 9.5”
TC ID	Unique in the spreadsheet and in the project
Category	A, B or C
Difficulty	Low, Medium or High
TC Situation	New, New Step or Without Changes
Assignees, Backup	Name, email or User ID of active team members; two different people

Optional columns

Automation Level

1, 2 or 3.

Title(English)

Up to 500 characters.

Steps texts

Precondition, Procedure and Expected Result: up to 10,000 characters each.

- Column names ignore case. A Status column is ignored: every case starts in To-Do.

Preview and common errors

Nothing is created with errors

The preview lists problems with the whole file first, then each row with its number, column and value. Fix the spreadsheet, remove the file and upload again.

Most common

- Missing required column or repeated header
- Value outside the list, like “Hard”
- TC ID repeated in another row
- Person not found, ambiguous or not in the team
