TEST CASE MANAGER · DOCUMENTATION

Board and Timeline

Filters and how to read the columns and the grid.

Board

Opening

One team: straight to your last project. More teams: pick one on a team card.

Columns

One per status, with the number of cases in each.

Cards

TC ID, Category, Difficulty, TC Situation and the assignee.

Moving

Drag a card, or use Move to. Cards you cannot move cannot be dragged.

Filters

They stay in the page address, so a shared link keeps them.

Developers

See every case of the project here, not only their own.

Timeline

Day, Week, Month

Pick a project and a view.
A vertical line marks the current time.

Cards

One card groups a Test Case’s changes on one day. Click it for each change: before, after, who and when.

Read-only

Filter by assignee or Test Case. Nothing here changes a case.
