TEST CASE MANAGER · DOCUMENTATION

General Results and Form Factor

Rounds, results per device and what each role sees.

Reading the table

One tab per project

Columns: TC ID, Assignee, Form Factor, SDF ID, the five latest run dates and Actions.

Every device

A collapsed row shows the first device. The arrow by the row number shows all of them.

Details and history

Click a result for details. View execution history lists every run on every device.

Older dates

Use the week picker or a day filter.

Who sees what

Administrator, manager, KP

Every active case of the projects in their scope.

Developer

Only the cases where they are the assignee or the backup.

Test rounds

Create test round

Captures every Test Case in In Validation. The SDF ID is optional but cannot repeat in the project.

Record result

In Actions, per device, by management or by the case’s assignee or backup.

Form Factor tab

The same table inside a project. Import and undo stay on General Results.
