TEST CASE MANAGER · DOCUMENTATION

Glossary

TC, KP, SDF, Form Factor, Backup, Pass Rate and other terms.

Cases and people

Term	Meaning
TC (Test Case)	One test to automate; its TC ID, like Clock_0001, is unique in a project
Assignee	The main person responsible for a Test Case
Backup	The second person; can exclude the case and receive it from the assignee
KP (Key Person)	The person who manages a team’s work
One UI	The software version a project targets, like 9.5
Device (model)	A phone or tablet model the project is tested on

Runs and results

Term	Meaning
Form Factor	The device dimension of the results, one result per device
SDF	The tool that runs the tests and exports the report
SDF ID	The identifier of an SDF run, from the report file name
Test round	A set of Test Cases in validation that waits for results
PASS, FAIL	The result of a run on one device
Pass Rate	On the Overview, the share of PASS per device in a project’s latest round

Test Case fields

Field	Values
Category	A, B or C
Difficulty	Low, Medium or High
TC Situation	New, New Step or Without Changes
Automation Level	1 not automatable, 2 partly, 3 fully automatable
Code done	First time the case entered In Review
End date	Run that completed PASS on every device
