TEST CASE MANAGER · DOCUMENTATION

Roles and permissions

What the administrator, manager, Key Person and developer can do.

The four roles

Administrator

Everything in the unit: users, sectors, teams, profiles, password resets and the Audit page.

Manager

Teams of the sectors they manage and teams they belong to: projects, Test Cases, users, rounds and SDF imports.

Key Person (KP)

Only their own teams: projects, Test Cases, members, rounds, SDF imports and device models.

Developer

Moves their own cases, excludes cases where they are backup, records results for their cases.

Your unit may differ.

The administrator can adjust the permissions of each profile on the Profiles and permissions page.
