TEST CASE MANAGER · DOCUMENTATION

Status and Situation

Status shows how far the work is. TC Situation shows how the case compares with earlier projects.

Two different questions

Status

Where is the work?

Tracks progress in this project and changes while the team works.

TC Situation

Where did the case come from?

Comes from the spreadsheet, rarely changes and does not affect the status.

The three situations

New

A case that did not exist before.

New Step

Exists for another One UI version, but an execution step changed.

Without Changes

Exists in another project; only the One UI version changes.
